

Workers Compensation Financial Policy

Since you have reported an industrial injury, your employer's insurance will pay 100% for all medical services related to the injury. In the event the injury is later determined to not be work related, you will be personally responsible for services rendered. As a courtesy, we will bill your health insurance at that time.

When you open a workers' compensation claim, it is important that you understand that your employer's insurance expects you to follow your doctor's recommendations. Your doctor has given you a referral for physical therapy. Therefore, it is extremely important that you attend your appointments with this office. We ask that you stop at the front desk after each appointment to confirm your next appointment.

Upon request we will provide you with an itemized statement showing the dates of your appointments so that you may seek mileage reimbursement from workers' compensation insurance.

Thank you in advance for your cooperation and courtesy in complying with your treatment plan and attending your appointments on time. Should you have any questions or concerns, please direct them to the front desk staff.

I have read and understand the above information regarding my workers' compensation claim. By signing this form I hereby give my consent to Active Life Therapy Clinic to provide physical and/or occupational therapy treatment to the best of their abilities.
